

# TECHLIFT M4

**Tech Lift M4** is based on 4 telescopic lifting columns which gives the lift a clean and stylish appearance, the operation is almost maintenance-free and has a very quiet drive.

The **Tech Lift M4** is as standard equipped with a battery backup for use during power outage. Doors and sides are covered with colored polycarbonate glass for a luxury look.

Its unique design means that there is no need for a support mast to one side, resulting in an unobtrusive lift that effectively blends in with the design and fabric of the building.
